Summary

I bring over 6 years of hands-on experience working with web technologies. I have applied these skills not only in professional settings but also in personal side projects. Proficient in developing robust and scalable applications, I excel at utilizing PHP, Django, Wordpress and Javascript to deliver effective solutions that meet both business and creative objectives. I also worked with DevOps technologies like Terraform and with different cloud providers (e.g. GCP, AWS, Contabo), I manage all the infra of my personal projects using these tools.

Experience

Software Engineer

Forty AU, LLC

May 2024 - Present (1 year 4 month)

Worked with web technologies across various stacks, including Rails, WordPress, and DevOps workflows using AWS. Skilled in developing and maintaining client-focused software solutions in cross-functional teams. Recently contributed to an award-winning WordPress project at Forty by building key components and pages.

Lead Technical Specialist

ROSHKA S.A.

Jul 2023 - May 2024 (10 months)

My focus is centered on leading the development of an innovative Home Banking system using React, working in collaboration with a team of developers, and reviewing technical aspects of the project. In my professional experience, I have successfully developed and maintained web applications utilizing the React. The technologies and tools I am proficient in include React.js, Redux, shadcn/ui, Tailwind CSS.

Software Developer

ROSHKA S.A.

Feb 2023 - May 2024 (1 year 3 month)

Development of an application using Django for testing bank operations of SPI 2 between banking entities, as well as the development of a documentation tool for projects. Additionally, I have experience working with Docker and Docker Compose.

Training Specialist

ROSHKA S.A.

Mar 2022 – May 2024 (2 years)

I prepare and teach courses in multiple technologies (backend and frontend), for people with little or no experience in the field and help to select the best students to work in the company. Skills: Python, Java, Swift, Javascript, React.

Software Developer

Softec

Dec 2020 - Mar 2022 (1 year 4 months)

I was in charge of developing REST APIs in Python (generally with Django), which are then connected with webs (HTML, CSS and Js), with mobile applications or with both. I was also in charge of the design of database structure according client's requirements.

Developer

Feb 2020 - Aug 2020 (7 months)

I was in charge of continuing the development of a livestock management system, where I had to test, correct, design and implement new modules. It was a web system written in C# and Javascript.

Software Programmer

Alpha Software

Jul 2019 - Mar 2020 (9 months)

Design and implementation of modules for ERP system written in VB.NET and used the SQL Server database. Some features are: invoicing, accounting and generate reports.

Education

Universidad Católica Nuestra Señora de la Asunción

Computer Science

2021 – 2024

Google Cloud

Associate Cloud Engineer Certification

2025

Other experiences

Vetesoftware.

Jul 2023 - Present (8 months)

[Vetesoftware](#) is software designed for veterinary management. The main module is intended for handling the veterinary clinic's patients and everything associated with them (weight records, appointments, treatments, analyses, vaccination plans, vaccinations, exams, or treatments). Skills: Python, Django, Postgres, Javascript.
