About me:

I'm a software developer who wants to improve every day and grow professionally. I would love to participate in a growing open source project.

WORK EXPERIENCE

16/03/2022 – CURRENT – Asuncion, Paraguay
TRAINING SPECIALIST – ROSHKA

I prepare and teach courses in multiple technologies (backend and frontend) for people with little or no experience in the field and help to select the best students to work in the company. I also help junior developers with their initial tasks to integrate more easily into work teams.

15/12/2020 – 15/03/2022 – Asuncion, Paraguay
SOFTWARE DEVELOPER – SOFTEC

I was in charge of developing REST APIs in **Python** (generally with Django), which are then connected with webs (HTML, CSS and Js), with mobile applications or with both. I was also in charge of the design of database structure according client's requirements.

01/02/2020 – 01/08/2020 – Asuncion, Paraguay
WEB DEVELOPER – TECNOTERRA

I was in charge of continuing the development of a livestock management system, where I had to test, correct, design and implement new modules. It was a web system written in C# and Javascript.

01/06/2019 – 01/02/2020 – Asuncion, Paraguay
APPLICATION PROGRAMMER – ALPHASOFTWARE

Design and implementation of modules for ERP system written in VB.NET and used the SQL Server database. Some features are: invoicing, accounting and generate reports.

OTHER EXPERIENCE

March, 2020

ML bootcamp – Penguin Academy

I participated in a bootcamp where I learned the basics of ML and use some libraries like TensorFlow, matplotlib, numpy and pandas.

VOLUNTEERING

07/08/2020 – 31/07/2021

Busca Mascota

I developed an application to report lost pets. The way it worked was you had to publish information about your lost pet, and then this publication would be shared on social media automatically. It was made with Django. <https://github.com/oscarGonzalez97/buscamascota/>
